

2010 CRH Program Statistics and Outcomes

Below is a summary of the diagnoses of the patients who participated in our inpatient rehabilitation program in Fiscal Year 2010. The chart shows the average cost and the percentage of patients who returned to the community. We are pleased that 100% of our patients reported overall satisfaction with their stay at CarolinaEast Rehabilitation Hospital.

Diagnosis	Average Age	% Male / Female	# Patients	CRH Average Length of Stay	% of Projected Functional Outcomes Achieved	Average Cost	% Returned to the Community	% Unplanned Transfers to Acute
Stroke	68	49/ 51%	79	14	68.1%	\$16,995	87%	4%
Brain	72	71/ 29%	7	8	63.5%	\$12,150	100%	0%
Neuro	49	83/ 17%	6	13	75.9%	\$16,424	83%	0%
Spinal Cord Injury	64	44/ 56%	9	19	68.5%	\$23,872	89%	11%
Amputee	64	60/ 40%	10	8	60.4%	\$13,754	70%	30%
Pain	78	43/ 57%	7	7	70.6%	\$11,328	100%	0%
Orthopedic	72	25/ 75%	65	8	76%	\$10,425	88%	6%
Cardiac	74	62/ 38%	13	7	63.1%	\$10,021	77%	23%
Pulmonary	68	42/ 58%	12	9	69.9%	\$13,394	83%	8%
Debility	72	58/ 42%	53	9	71%	\$12,698	89%	9%
Multiple Trauma	64	100/ 0%	1	4	22.2%	\$16,340	0%	100%
Other	89	0/ 100%	1	9	16.7%	\$10,076	100%	0%

*Outcomes data excludes patient cases (9) that had the same assessment date for both admission and discharge FIM reporting.
